DETAILED ACTION

Applicant's Preliminary Amendment was not received until after the office action mailed on 02/13/02. The new office action follows below and the time period has been reset in accordance therewith.

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

| | |
|-----------------|------------------------|
| Embodiment I | Figures 1, 4-5, 15-34. |
| Embodiment II | Figures 2-3. |
| Embodiment III | Figure 6. |
| Embodiment IV | Figure 7. |
| Embodiment V | Figures 8-9. |
| Embodiment VI | Figure 10. |
| Embodiment VII | Figure 11. |
| Embodiment VIII | Figure 12. |
| Embodiment XI | Figure 35. |
| Embodiment X | Figure 36. |
| Embodiment XI | Figure 37. |
| Embodiment XII | Figure 38. |

Embodiment XIII Figure 39.

Embodiment XIV Figure 40.

Embodiment XV Figure 41.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Because each embodiment would show in different connection of power layers and ground layers to a substrate.

The following claim(s) **are not** generic: claims 1-16.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: see (2).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
